Visgean Skeloru

Edinburgh / Prague / Remote
visgean@gmail.com

TECH Python, Numpy, SciPy, Django, Pandas, Haskell, Bitcoin, Ethereum, PostgreSQL, Redis, MongoDB and many others

INTERESTS Currently I am learning about classical AI and deep learning. In future I look forward to learn Scala and Clojure. When I am not sitting in front of screen I do photography, read fiction and run.

I have been doing backend and fullstack development professionally for about 7 years now, before that I was doing it for fun. Over the years I have developed taste for a good and well organized code and learned to recognize unhelpful strategies and dogmas.

EXPERIENCE *Project lead developer, contract*   May 2017 - May 2018
AgFunder Inc., San Francisco, CA
- I was responsible for managing two developers and managing collaboration with external specialists on deployment and frameworks.
- Provided expertise and advice on architectural decisions. I have been praised several times for opposing technical solutions that I did not see maintainable and for proposing better alternatives.
- I made sure code-base was kept clean with tests and according to standards. Moreover I convinced other members why we all should be doing this.
- I wrote comprehensive reports to benchmark and compare different technologies we could use which increased the confidence in the decisions we later took.

Fullstack developer, contract   March 2015 - Ongoing
Webarchive of National Library of the Czech Republic
- Designed database, data migration process. UI and business logic.
- Survived government speak and got through process of two public contracts.

Researcher   June 2016 - December 2016
Bitcoin mining pool (Remote)
- Researched Ethereum mining algorithms and ecosystem.
- Designed working prototype of Ethereum mining pool.

Django backend Developer   April 2015 - April 2016
coex.cz, digital agency in Prague (full-time)
- Python, Django, PostgreSQL and many other technologies.
- I enjoyed working on a broad spectrum of projects across the industries.
- I experienced how is it to work in teams on projects where many parties have to cooperate and influence final decisions.

Freelance   2010 - 2015
Visio Netmedia, Nedaleko Gastro Group and other clients
- Example websites: vycepnastojaka.cz, klckrystof.cz, filtracnitechnika.cz
- Worked in two startups - TopSceneries (co-founded) and Projectonaut, both of them failed but nevertheless it was a great experience.

AWARDS	Facebook White Hat bounty award, *$6500*	2013
	Senior UK Mathematical Challenge, *silver*	2013
	Intermediate UK Mathematical Challenge, *bronze*	2012
	Gold Badge, Czech Debating Association	2014
	The Duke of Edinburgh Award, *Gold, Silver, Bronze*	2014, 2012, 2011

RECOMMENDATIONS

Robin Ranjit Singh Chauhan   Head of Engineering, AgFunder

Visgean is highly skilled and a pleasure to work with. Technically he is very competent in the various technologies we used. I have worked with many developers, and have found that technical competence alone is not sufficient – he also brings tenacity and strong soft skills which are key for more advanced work.

He often foresees issues in advance, and is skilled at navigating the many decisions that need to be made in designing good systems. He thinks through implications and edge cases, and can explain his thinking clearly, which is rare. He writes and diagrams clearly to convey and convince with his technical findings, which benefits the team.

He is a leader, successfully managing two other developers on our projects with great results.

I recommend Visgean without reservation.
